Life Science Segments ——

Cascade Personalized Customer Engagement

Meplis helps organizations in all Life Science segments by offering engaging solutions configured from the Meplis platform technologies that combine rich content formats, support systems, connectivity, intelligence and integrations.

We support deep cascade engagement from Industry to HCPs and from HCPs to patients to drive real differentiation and create value for all stakeholders to boost ROI

Pharma | Biopharma

Increase differentiation by helping physicians and clinics better manage their practices and improve patient outcomes. Provide rich content and support systems to improve patient relations and satisfactions.

→

Medtech | Medical Devices

Boost product awareness, knowledge or technical skills by offering physicians and HCPs a community with dynamic personalised educational content or courses, Livesteams, decision support systems, social networks and more.

→

Consumer Health

Foster and improve brand commitment and consumer loyalty by offering rich engaging experiences through personalised content, self management tools and support services on mobile apps or web platforms

→

Public Health

Monitor populational health or diseases in real-time or Manage Public health campaigns using Meplis Continuous Monitoring and Communication Platforms. Offer community engagement platforms to foster collaboration between providers, public health agencies and the community.

→

Payers

Improve customer satisfaction and optimise healthcare outcomes by Leveraging value based care solutions build on the Meplis platform. Gain deeper insight in healthcare utilisation patterns, provider performance and cost trends. Provide personalized health programs and preventive care recommendations.

→

Providers

Improve operational efficiency by Optimizing Care Coordination using data-driven decision making and AI. Enhance patient treatment plan adherence by providing Follow-up care platforms. Save HCP time and enrich patient communication with personalised educational on treatment pathways. Improve quality by monitoring HCP protocol adherence and patient outcomes.

→

Healthcare Segments ——

Leverage personalized content, smart decision support and intelligent care coordination

We support organizations in all healthcare segments to build applications & solutions to improve patient outcome by using Meplis technologies for remote patient monitoring, AI optimized Care coordination, and personalised dynamic education.

Big challenges in healthcare require solutions that support a multistakeholder approach where all players of the healthcare segment can collaborate to create efficient engagement to drive measurable results.

Collaborative Product Life cycle Solutions

Meplis solutions can be configured to meet a variety of challenges in product lifecycle management. Leverage engagement upon engagement with ecosystems and communities.

Innovative Research & Development support

Streamline processes and improve collaborations between R&D teams with Meplis Workspaces. Facilitate Multi-stakeholder and external partner collaboration through files, libraries and data sharing.

Patient-centric Clinical Trials

Patient-centric trials by leveraging Meplis integrated solutions for patient recruitment, effective real time patient communication, dynamic content personalisation, remote monitoring adherence tracking and multi-site population management.

Mastering Real World data (RWD)

Meplis patient remote monitoring solution can be integrated with wearable data sources, EHRs and other systems. Gather insights in treatment effectiveness, experiences and side effects with Meplis patient reported outcomes system for web and mobile apps. Collaborate on reported outcomes related to drug safety and get alarmed of potential risks and adverse events.

Comprehensive Physician (HCP) Engagement

Leverage Physician Engagement communities using personalised content, diagnostic decision support tools, clinical trials, educational pathways, product updates & support, case sharing and communication with Product specialists and Sales reps. Use integrated Livestream events and access to RWD insights.

Cascade Patient Engagement

Help physicians improve patient relations and communication by bundling personalised education, remote monitoring and feedback collection in a multi-tenant solution where patients recognise their HCP identity and practice. Improve care coordination in multi-disciplinary settings

Holistic Adherence Solutions

Discover new approaches for chronic disease management and treatment adherence. Use a multidimensional approach and recognise that every patient is different. Combine AI driven personalisation for content, feedback, support tools to create truly relevant and engaging solutions.

Our technology and services drive healthcare innovation, with user-friendly interfaces, robustness, and security. We are a transformative force made to improve the way you connect, collaborate, and innovate the pharma | biopharma landscape. Meplis brings forward-thinking solutions to empower your organization to face evolving challenges and opportunities in the healthcare industry.

Contact us today to embark with Meplis as a strategic partner towards improved patient outcomes, innovative research, and industry leadership.

Revolutionize HCP Engagement

Discover how our innovative Meplis platform can reshape the way you interact with healthcare professionals (HCPs), foster collaboration and drive your success.

HCP | KOL Collaboration Hub

Establish a dedicated collaboration hub for Key Opinion Leaders (KOLs) to provide valuable input during the device design phase. Capture insights and recommendations to inform your development team.

Clinical Trial Management

Streamline and optimise clinical trial processes, incorporating valuable insights gathered from KOLs and other stakeholders during the design phase to ensure alignment with real-world needs.

Omnichannel Physician Engagement

Support your omnichannel strategy with Meplis technology through multi-channel communication, personalised content delivery, interactive educational tools, virtual Livestream events, real-time information sharing, RWD evidence and Treatment decision support. Provide a holistic experience that aligns with HCP preferences and work styles.

Cascade Patient Engagement

Empower Healthcare professionals for enhanced patient care by equipping HCPs with patient monitoring, personalised AI driven patient education and improved communication solutions from Meplis. Gather cross practice RWD insights and feedback while offering a complete solution beyond the product.

Real World Data (RWD)

Our integrated solution offers a seamless and holistic approach to leverage RWD effectively throughout the medical device development lifecycle. Collect patient-reported outcomes and experiences. Prioritize data privacy and security with Meplis's robust solutions. Trn RWD insights into actionable intelligence for evidence-based decision making.

Communication Platforms

Empower physicians to securely connect and schedule virtual consultations with industry-leading Key Opinion Leaders, fostering knowledge exchange and driving innovation in healthcare. Allow physicians to see expert advice on challenging cases, fostering a collaborative environment that drives informed decision-making and improves patient outcomes.

The Cascade Effect

In the evolving landscape of healthcare, Meplis facilitates a cascade of rich engagement, empowering the medical device and Medtech industry to collaborate with Healthcare Professionals (HCPs) and, in turn, enhance patient care through advanced monitoring, education, and communication tools.

Besides only offering direct engagement to HCPs with professional education and decision support systems, the cascade approach equips HCPs with advanced tools for patient monitoring, personalized patient education, and secure communication.

The cascade approach enhances patient understanding, adherence, and involvement in informed decision-making.

Physicians offer enhanced patient care and work towards improving outcomes, and higher patient satisfaction. HCPs reduce time on education, making the time they spend with patients more valuable and impactful and their practices more efficient.

Industry innovations positively impact healthcare practices and contribute to better patient outcomes. By strengthening the connection between industry, HCPs, and patients, we empower a holistic approach to healthcare delivery.

Continuous Value Cycle

Experience synergy across the entire healthcare ecosystem with our unified enterprise solution. Each phase in the lifecycle propels the success of the next.

Opt for our integrated platform to streamline operations, saving both time and costs. Centralizing processes across the healthcare lifecycle not only reduces financial overhead but also enhances organizational efficiency, promoting seamless collaboration, and accelerating the pace of innovation.

CONTACT MEPLIS

Consumer Health

Impacting Consumer Health

We support Consumer health companies to create dynamic user-centric ecosystems that empower individuals to take an active role in managing their health and well-being. We generate insights into user behavior, preferences and health outcomes and support improved brand loyalty, drive differentiation and increase efficiency in marketing spend.

Workforce Health & Wellness Management

Drive a healthier and more engaged workforce by using Meplis technology to create company wide solutions containing health risk assessments, personalised wellness programs with education, tools and incentives, Continuously optimise by tracking workforce health indicators and create a proactive a approach that contributes to detection and prevention.

Provider Collaboration Hub

Strengthen provider relations by establishing a centralized communication hub wherein your organization can collaborate with healthcare providers. Combine secure messaging, file-sharing, real-time communication and Livestreams to streamline interactions. Offer detailed product information, with usage guidelines and relevant clinical data to foster provider support

Personalised Health Apps

Reduce time to market for your personalized health apps by including user profiles and preferences, health risk assessments, customized wellness journeys, wearable integration, nutrition and activity tracking and guidelines, goal based social networks, personalized alerts for adherence and behavioral health support.

Cascade Consumer Engagement solutions

Work with intermediates such as providers or distributors to offer solutions for better consumer monitoring or inventory management and offer discount coupons for usage of your products through their consumers using the applications packed with features to improve self-care such as personalised education, pathways, decision support tools and social networks. Get market insights and drive loyalty.

Branded wellness communities

Leverage communities for consumers to interact will other to improve well-being, for coaching or support. Brand, soft-brand or co-brand with partners to grow support and credibility. Pack with Livestreams, personalised guidance, integrate wearables, wellness pathways and partner services.

Nutricion Management Programs

Position your products with additional AI empowered tools to personalize content based on consumer goals . Help consumers find the most suitable product from your range and monitor relevant health indicators. Aid health professionals in discovering desnutricion in treatment pathways to improve patient outcomes. Couple discount coupons delivered through application use and track with marketing intelligence to grow market share or size.

Synergy beyond going solo

Consumer health organizations may **struggle to find an effective way to create differentiation value** for their products through technology. Sometimes this can be because their **product is only used in certain specific cases of a more complex care or treatment pathway**. It does not seem reasonable to invest in a full pathway improvement solution alone and carry all the costs.

Meplis has the technology to **create solutions in collaboration with you and partner organizations that have products or services in other sections of the pathways**.

We can **help you find the complementary partners** you seek to improve outcomes, and perceived value and strengthen consumer relations. Let s know if you are interested.

CONTACT MEPLIS

Public Health

Address critical health challenges

By using Meplis technologies for public health solutions, organizations can enhance their ability to address critical health challenges, promote preventive measures and effectively engage with communities to improve overall public health outcomes.

Health Education & Awareness Campaigns

Create Meplis platforms to host health education and awareness campaigns. These can include interactive content, targeted messaging, and resources to educate the public on preventive measures, vaccinations, and healthy behaviors.

Collaboration Platform for stakeholders

Establish Meplis collaboration platforms to facilitate communication and information exchange among public health stakeholders, including government agencies, NGOs and healthcare providers.

Public Health Surveys and Research

Utilize Meplis to create platforms for conducting public health surveys and research. This facilitates data collection, analysis and the generation of insights to inform public health policies and interventions.

Community Engagement Platform

Develop community engagement platforms with Meplis to connect public health agencies with the community. This involves features for sharing information, addressing concerns and fostering a sense of community involvement in health initiatives.

Disease Surveillance & Monitoring

Develop tools with Meplis for real-time disease surveillance and monitoring. This includes features for tracking the spread of diseases, analyzing trends and providing timely updates to public health authorities.

Population Health Management

Implement population health management solutions with Meplis to track and analyze health data at the population level. This includes identifying health disparities, monitoring key health indicators and planning interventions

Emergency Preparedness and Response

Meplis can support the creation of solutions for emergency readiness and response. This includes tools for coordinating resources, communication emergency information and facilitating a swift response during crisis.

Disease Management Programs

Create disease management programs on Meplis to address prevalent health issues. This involves personalized care plans, remote monitoring and interventions to manage chronic or non-chronic health conditions effectively.

Large-Scale Research

Meplis is a consortium beneficiary in the Magnet4Europe project.

Magnet4Europe is a four-year Horizon 2020 EU-funded project (Grant Agreement 848031) that aims to improve mental health and wellbeing among health professionals in Europe. The project officially started in January 2020 and takes place in six European countries.

Meplis provided the technology for data capture and surveying nurses and physicians in 6 different languages in more than 60 European hospitals spread over 6 countries. Containing the possibility for participants to create an account and accept policies only once (providing insight into longitudinal data) or for participants to answer anonymously.
